

For all Sage 300 ERP users who want a simple way of keeping track of all their customer, vendor or other contacts.

A true Sage 300 Contact Management module that gives you the benefit of having a single sign-on, single database and consistent look and feel.

Benefits of our approach

- A true end-to-end solution. No integration hassles.
- Lower total cost of ownership.
- An industry-standard ERP system with hundreds of modules.
- A global network of thousands of independent certified consultants.

Dingosoft Contact Manager is a Sage 300 ERP module which provides a central database of all contacts whether they be customers, vendors, sub-contractors, consultants, staff, competitors, in fact anyone at all.

Contact Manager also provides true many-to-many linking of contacts with Customers, Vendors or Trust Accounts

Loads of great features like multiple addresses with Google Maps integration, MS Outlook integration and Skype integration which allows you to call or message a contact directly from within Sage 300 ERP.

We have professional resellers all over the world who are certified in Sage 300 ERP.

Dingosoft has been a leading Sage 300 ERP development partner since 1999 and our experience and expertise goes back even further.

Over 40,000 customers across 160 countries use Sage 300 ERP. Wherever you are in the world, chances are there will be multiple local support and training options available for you to choose from. Contact Sage at www.sage.com to find out the options available in your area.

Freedom of Choice

On-Premise & Cloud. It may be right for you to implement your Sage/Dingosoft solution at your business premises, or it may suit you better to run it in the cloud. Whatever route you choose, you won't be locked in as you can migrate between cloud-based and on-premise software.

Proven Technology

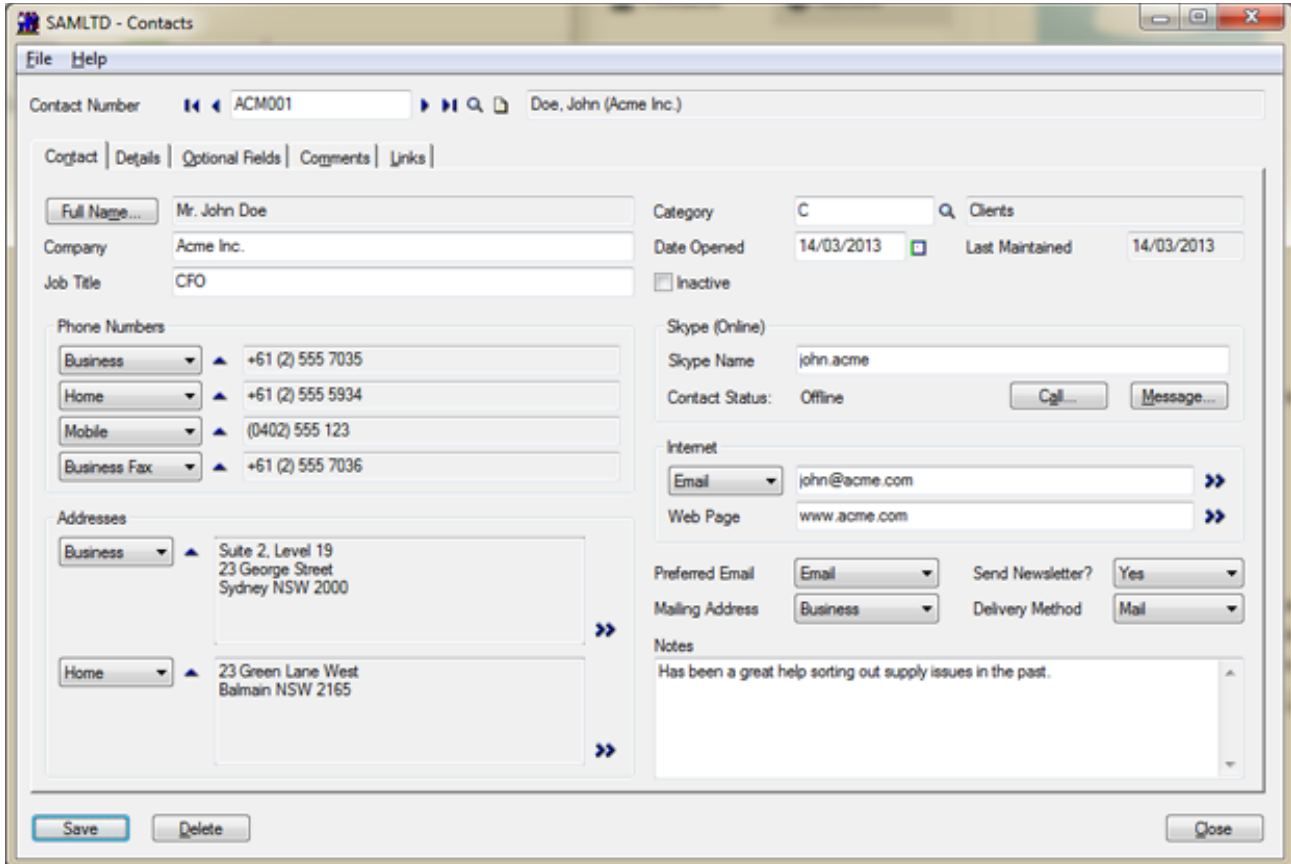

Dingosoft products are developed using the Sage 300 ERP SDK - the exact same tools used by Sage themselves. This not only keeps our development costs (and therefore our prices) down, it means we are using proven technology and architecture as used by thousands of Sage customers over many years.

Perfect Choice

With Dingosoft and Sage 300 ERP, forward-thinking businesses like yours get the freedom of choice, smooth collaboration, superior performance, and reliability needed to increase profitability and seize the competitive advantage.

The screenshot shows the 'SAMLTD - Contacts' application window. The contact details for 'Doe, John (Acme Inc.)' are displayed. The contact number is 'ACM001'. The contact is categorized as 'Clients' and was opened and last maintained on '14/03/2013'. The contact is currently 'Offline'. The contact has multiple phone numbers: Business (+61 (2) 555 7035), Home (+61 (2) 555 5934), Mobile ((0402) 555 123), and Business Fax (+61 (2) 555 7036). The contact has two addresses: Business (Suite 2, Level 19, 23 George Street, Sydney NSW 2000) and Home (23 Green Lane West, Balmain NSW 2165). The contact has an email address 'john@acme.com' and a web page 'www.acme.com'. The contact's preferred email is 'Email' and the delivery method is 'Mail'. The contact has a note: 'Has been a great help sorting out supply issues in the past.' The application window includes 'Save' and 'Delete' buttons at the bottom left and a 'Close' button at the bottom right.
